

Hi. We're Metas.

Your guide to a new label ecosystem.

metas

• • • • MANAGED LABEL SERVICES®

A label solution as clean as they come.

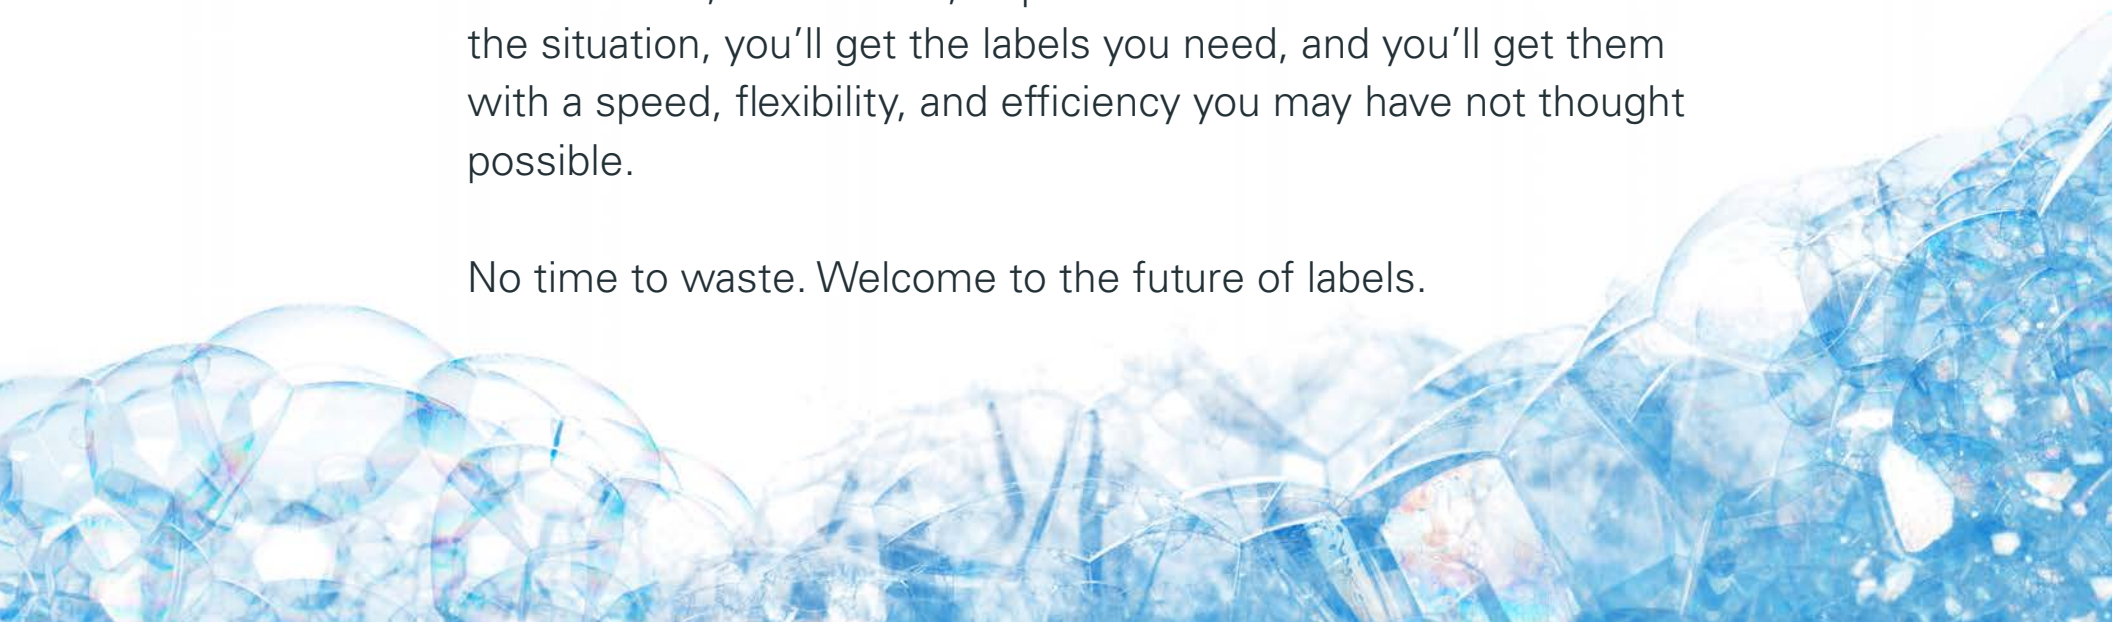

Labels re-imagined.

Imagine what you could do with a better, faster, greener label ecosystem. The latest advances in technology can offer you a whole new world of label solutions. No estimates to get or POs to create. No invoices to process or label inventory to carry.

With Metas Managed Label Services[®], you'll have a label ecosystem tailored to your specific needs.

Short runs or long runs, high volumes or low volumes, standardized, customized, or private label solutions - no matter the situation, you'll get the labels you need, and you'll get them with a speed, flexibility, and efficiency you may have not thought possible.

No time to waste. Welcome to the future of labels.

**No longer a limitation,
a label is now
an opportunity.**

Wildly Customizable.

When companies develop their brands, they need the flexibility to innovate. They need options. But traditional label processes are rigid, **heavily time-constrained**, and full of pitfalls. Labels can be the enemy of brand and product development. *Until now.*

Thanks to our proprietary, service-based tech, we can offer our customers a nearly unlimited level of customization, at faster speeds and lower costs than standard labels.

No matter how specialized the need, we guide you to a fast, affordable label solution, enabling you to create new, unique products at a pace uninhibited by your labels. It's flexibility and innovation in label form.

With Metas Managed Label Services[®], you'll get the labels you want, when you need them, for far less cost, and in far less time.

As your guide, we're here to show you how.
